### DETAILED ACTION

1. This application has been examined. The amendment filed 10/3/05 has been entered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 21, 23, 24, 28, 33-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noguchi et al (5642135) and Ushida et al (5717793).

4. Regarding claim 1, Noguchi et al show the information processing apparatus that outputs a photographic image and line drawing image (abstract, column 2 lines 1-20), including: a first output means which generates a photographic image by performing resolution conversion to a first source image at a first conversion rate and outputs the photographic image (column 2 lines 1-20, column 5 lines 10-25, column 6 lines 15-43, column 32 lines 10-25 and 60-67), a second output means which generates and interpolates a line drawing image by performing a resolution conversion to a second source image at a second conversion rate which is different from the first conversion

rate (column 2 lines 45-55, column 5 lines 40-60, column 19 lines 15-48, column 28 lines 40-53, column 32 lines 15-30), with the line drawing image being overlaid on the photographic image (column 17 lines 45-60, column 32 lines 25-39) to produce a superimposed image. Noguchi et al do not specifically mention pixel thinning the photographic image to perform the resolution conversion before the overlay, but do mention efficient resolution conversion for image processing. Furthermore, Ushida et al do mention pixel thinning to perform resolution conversion for image processing (Figures 19-21, column 7 lines 45-65, column 8 lines 35-60). It would have been obvious to a person with ordinary skill in the art to have this in Noguchi et al, because it would provide an efficient way to perform resolution conversion in an image processing system that combines image data.

5. Regarding claim 2, the photographic image and line drawing are displayed on a display (Noguchi et al column 17 lines 40-60).

6. Claim 21 shows the same features as claim 1 and is rejected for the same reasons.

7. Regarding claim 23, note the touch tablet (Noguchi et al column 6 lines 60-67).

Art Unit: 2174

8. Claim 24 shows the same features as claim 1 and is rejected for the same reasons.

9. Claim 28 shows the same features as claim 1 and is rejected for the same reasons.

10. Regarding claim 33, the resolutions are different (Noguchi et al column 27 lines 15-45, column 32 lines 25-45).

11. Regarding claim 34, the smaller resolution matches the display resolution (Noguchi et al column 27 lines 30-60).

12. Regarding claim 35, the larger resolution matches the display resolution (Noguchi et al column 28 lines 30-50, column 30 lines 15-55).

13. Claims 7-20, 25-27, 30-32 are allowable over the prior art of record. These show the filtering and interpolation techniques, which combined show a different resolution process and overlaying.

14. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

15. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

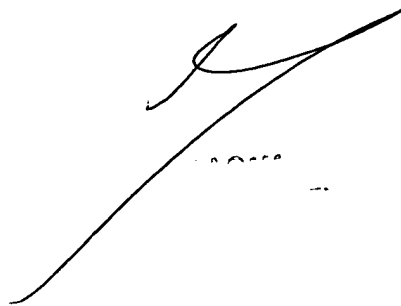

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
